

EZSLAM

INSTALLATION/SOFTWARE/USAGE

Q: Question

Would it be possible to generate an “Energy vs Angle” Graph ?

A: Answer

Recall that Energy is a cumulative value; Force *times* distance/angle is not the same as Force *at* a distance/angle.

In EZSlamX, there is an alternative graph of the individual “stack,” but it is in function of the input energy. In other words, if you would give X amount of energy, how would it be proportioned into all its sub-components.
